Re: *In the Matter of IP-Enabled Services*, WC Docket No. 04-36 and *IP-Enabled Services E911 Requirements for IP-Enabled Service Providers*, WC Docket No. 05-196

Dear Ms. Dortch:

On the 21st of September, 2005, undersigned counsel and Bill Hunt of Level 3 Communications, LLC communicated with Michelle Carey, Legal Advisor to Chairman Martin, to explain the geographic scope of Level 3's VoIP E911 services, and provided Ms. Carey with the following links to Level 3's website: <http://www.e911direct.com/> and http://www.e911direct.com/coverage_map.php. As Level 3 explained in those communications, the map at http://www.e911direct.com/coverage_map.php depicts the areas where Level 3 currently has direct trunking to Selective Routers in place. Level 3 further explained that the map does not reflect current coverage for the I2 solution, as offering VoIP E911 using the I2 solution requires additional steps beyond the provisioning of direct trunks to the Selective Router, and some of these requirements are not within Level 3's direct control.

In accordance with FCC rules, a copy of this letter is being filed electronically in the above-referenced dockets.

Sincerely yours,

/s/

Brita D. Strandberg
Counsel to Level 3 Communications, LLC
